### **DETAILED ACTION**

In response to the communication filed on November 25, 2003, claims 1-10 are active in this application.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Oath/Declaration***

Oath/Declaration filed on November 25, 2003 has been considered.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard J. Streit on September 24, 2004.

The application has been amended as follows:

Re claim 6, line 1, change "the power" to --wherein the power of the third deposition conditions--.

Re claim 8, page 14, line 2, insert --of the first deposition conditions--after "interval".

Art Unit: 2813

Re claim 8, page 15, line 1, insert –of the first deposition conditions—after “pressure”.

Re claim 9, line 2, insert –of the first deposition conditions—after “interval”.

Re claim 9, line 3, insert –of the first deposition conditions—after “pressure”.

Re claim 10, line 1, insert –of the third deposition conditions—after “power”.

### ***Reasons For Allowance***

3. Claims 1-10 are allowable over the prior art of record.
4. The following is an examiner's statement of reasons for allowance: the prior art of record neither teach nor make obvious the claimed limitation of the instant application as a whole as recited in claims 1 and 7, respectively. In particular, the prior art does not teach or suggest relieving the stress and preventing the bending of the insulating substrate of a TFT by successively forming first and second insulating films on the insulating substrate including the gate electrode, the first insulating film being formed under first deposition conditions including power, pressure and electrode interval, the second insulating film being formed under second deposition conditions where at least one of the first deposition conditions is changed *continuously* over time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kim, U.S./6,589,825 B2 and Nakahori et al., U.S./6,399,428 B2 teach the similar methods for forming the device.
